

CLINICAL LABORATORY REPORT

Patient & Sample Details

Patient Name:	Rohan Mehta	Sample Collected:	10-Apr-2026 08:45 AM
Age / Sex:	42 Years / Male	Report Generated:	10-Apr-2026 01:15 PM
Ref. Doctor:	Dr. Neha Kulkarni (MD – Internal Medicine)	Lab ID:	LAB-APR26-004512
Diagnosis:	Acute Viral Gastroenteritis with Moderate Dehydration	ICD Code:	ICD-10: A09

1. Complete Blood Count (CBC)

Parameter	Result	Unit	Reference Range	Flag
Haemoglobin (Hb)	13.8	g/dL	13.0 – 17.0	Normal
Haematocrit (HCT)	48.6	%	40 – 50	↑ Mild Elevation
Total WBC Count	10,400	cells/ μ L	4,500–11,000	Normal
Neutrophils	72	%	50 – 70	↑ Mild Elevation
Lymphocytes	22	%	20 – 40	Normal
Eosinophils	2	%	1 – 4	Normal
Platelet Count	2,18,000	cells/ μ L	1,50,000–4,00,000	Normal
MCV	88	fL	80 – 100	Normal

2. Serum Electrolytes

Electrolyte	Result	Unit	Reference Range	Flag
Sodium (Na ⁺)	131	mEq/L	136 – 145	↑ Mild Hyponatremia
Potassium (K ⁺)	3.2	mEq/L	3.5 – 5.0	↑ Mild Hypokalaemia
Chloride (Cl ⁻)	96	mEq/L	98 – 107	↑ Mild Low
Bicarbonate (HCO ₃)	20	mEq/L	22 – 29	↑ Mild Low
Serum Osmolality	278	mOsm/kg	285 – 295	↑ Mild Low

3. Inflammatory Marker – C-Reactive Protein (CRP)

Test	Result	Unit	Reference Range	Flag
CRP (Quantitative)	22.4	mg/L	< 5.0 mg/L	↑ Elevated – consistent with acute infection/inflammation

4. Stool Routine Examination

Parameter	Observation	Expected (Normal)	Remarks
Colour	Yellow-Green	Brown	Altered – suggestive of infection
Consistency	Watery/Loose	Formed	Consistent with diarrhoea
Mucus	Present (+)	Absent	Mild mucosal irritation
Blood (Occult)	Absent	Absent	Normal – no haemorrhagic component
Pus Cells	8–10 / HPF	0–5 / HPF	↑ Elevated – indicates infection
RBC	0–2 / HPF	Absent	Trace – non-significant
Cysts/Parasites	Not detected	Not detected	Normal
Bacteria (Smear)	Gram-neg rods present	Absent	Consistent with bacterial/viral GE

5. Renal Function Tests (Screening)

Parameter	Result	Unit	Reference Range	Flag
Blood Urea Nitrogen (BUN)	24	mg/dL	7 – 20	↑ Mild Elevation (dehydration)
Serum Creatinine	1.1	mg/dL	0.7 – 1.2	Normal
BUN/Creatinine Ratio	21.8		10 – 20	↑ Suggestive of pre-renal cause

Interpretation & Remarks

Lab findings are consistent with **Acute Viral Gastroenteritis with Moderate Dehydration**. Elevated haematocrit and BUN suggest haemoconcentration secondary to fluid loss. Mild electrolyte imbalance (hyponatraemia, hypokalaemia) is consistent with excessive diarrhoea-related losses. Elevated CRP supports an ongoing acute-phase response. Stool examination reveals loose watery stools with increased pus cells and gram-negative rods, consistent with acute infective gastroenteritis. Clinical correlation advised; IV rehydration and electrolyte replacement are appropriate.
